

Programme on Ecosystem Change and Society (PECS)
Scientific Committee Member, 2009–11

Pablo Eyzaguirre

Pablo B. Eyzaguirre is a senior scientist in anthropology and socioeconomics at Bioversity International (formerly IPGRI) in Rome. A citizen of Chile, Eyzaguirre received his PhD in anthropology (1986) from Yale University and is a specialist in social and ecological anthropology, tropical farming systems, and agrarian institutions. He has taught anthropology in the US, and conducted field research on ecology, institutions, and livelihoods in West and Central Africa. Internationally, he has worked in all major regions of the world, and has published widely on culture and environment in agrarian societies, home gardens, ethnobotany, nutrition, agricultural research and natural resource management in developing countries. He is the author of the book *Agricultural and Environmental Research in Small Countries*, (John Wiley & Sons, Chichester, UK. 1996). His most recent book is *Home Gardens and Agrobiodiversity* (2004) Pablo Eyzaguirre and Olga Linares, (eds), published by Smithsonian Books, Washington, DC. He co-edited, 'Property Rights, Collective Action and Local Conservation of Genetic Resources' (2007) *World Development* 35: 9.

Eyzaguirre is past-president of the International Society of Ethnobiology (2004–06), and advises global agencies, foundations, and corporations on the role of agricultural biodiversity and agrarian communities in food security, conservation, and ecohealth. Most recently he has been leading global research initiatives that investigate the link between the foods sourced from diverse local ecosystems and human health across cultures. He is also working with conservation biologists and development workers in several countries to integrate agricultural biodiversity and sustainable livelihoods for agrarian and indigenous communities in the management of protected areas.
