

**Programme on Ecosystem Change and Society (PECS)**  
**Scientific Committee Member, 2009–11**

**Bob Scholes**

Dr Bob Scholes is a systems ecologist at the Council for Scientific and Industrial Research in South Africa. He has over two decades of research experience on the topic of global climate change, including over a hundred peer-reviewed scientific publications on this and related topics. Dr Scholes has served on the steering committees of several international global change research programmes such as the International Geosphere-Biosphere Programme and the Global Climate Observing System.

He was Chairman of the Global Terrestrial Observing System 2001–4, a member of the GEO Implementation planning Task Team, a co-chair of the Conditions Working Group of the Millennium Ecosystem Assessment and also a principal investigator in the Southern African Millennium Assessment at regional scale. He also served on the steering committee of the South African National Climate Change Committee. He was a Lead Author in the third and fourth Assessments of the Intergovernmental Panel on Climate Change.
