

Yonglong Lü

Dr. Yonglong Lü is currently the Director General of Bureau of International Cooperation, Chinese Academy of Sciences (CAS); Professor and Chair in Environmental Management and Policy at Research Center for Eco-Environmental Sciences, CAS. Prof. Lü has a wide range of research interests including sustainability science, systems ecology, resource and environmental economics, environmental management and policy, and strategic planning of science and technology development. He has published more than 100 papers in international and domestic peer reviewed journals, and authored or co-authored 15 books. His papers and books have been widely cited and appreciated with some of them listed as classical citations. Prof. Lü is a known environmental scientist. He has been a project leader/coordinator or chief scientist for some 30 national or international cooperative projects. He serves as an editorial board member of Chemistry and Ecology and other peered journals, and has been invited to be a peer reviewer for a dozen of internationally known environmental journals such as Environmental Science and Technology. He has been invited by UNDP, UNEP, UNESCO, APEC, ICSU, SCOPE, IAC and IIASA many times to make presentations or keynote speeches at international conferences or forums, and to visit some 40 countries for cooperative research and academic exchange. He has been involved in many scientific planning and review activities of ICSU, PSA, IAP and IAC for promoting science and technology capacities in China and the world. Due to his achievements, Dr. Lü has obtained several awards and honors from the State Council of China, Chinese Academy of Sciences and other organizations he has worked with, including 2nd National Prize for Advancement of Science and Technology.
